Did you previously file a US application (either provisional or non-provisional)? Yes No

If so, Serial #: _____ Filing Date: _____

Did we file your US Application? Yes No If no, please email or mail a soft copy of the application and drawing files, or attach a hard copy.

Title of invention: _____

General Description of invention: _____

Detail any features of your invention that have changed between now and your US filing date:

PATENT DRAWINGS

Formal drawings are priced at \$100/sheet for utility patents. PCT applications require drawings to be completed on A4 sized paper. The number of drawing sheets will be identical to what you submitted with your US Application, or, if a new application, estimated at three sheets.

Prepare new formal drawings: Use drawings from US application:

I will furnish the drawings: Please quote patent drawings beforehand:

COSTS

PCT Patent Application: \$900* (our fee to convert a US application to a PCT application)

PCT Filing Fee (to US PTO): ~ \$2,900 (estimated filing fee, which varies by number of sheets, etc.)

New Drawings @ \$100/sheet: \$ _____ (use either three sheets, or the number in your US application)

Total: \$ _____

*The Drawing Sheet charge may increase or decrease based on the complexity of your case and how many sheets are required. 3 sheets is average. Excessively complex patents, such as those requiring more than 15 claims or in a chemical or biotech or complex field, will be quoted at a higher rate and work will not begin until the quote is accepted and paid by the client. Listed fees are for relatively simple mechanical or method inventions.

COMMUNICATION

The secrecy of your invention and the details of your patent are important to us. While we prefer to communicate with you via email, for ease and speed, we are also aware that many clients prefer to communicate by other, possibly more secure but more expensive means. As such, please let us know the way you would prefer that we communicate with you, send you drafts of your claims and specification, and so forth. (Note that we password-encrypt all .pdf files emailed to you, using the last 4-digits of your phone number above as the password.)

DEADLINES

If you have previously filed a provisional or non-provisional US Patent Application, please indicate the one-year anniversary date here. This is the "drop dead" date for filing your foreign patents, and is your PCT Application deadline. If this date is less than three weeks away, there may be additional RUSH fees in order for us to meet your deadline. RUSH Fees are 33% for each week fewer than four that we have to prepare your application. For example, if we only have one week until the deadline, our fees would increase 66%, or \$600, for a total of \$1,500.

CSV is the 3-digit number on the back of your card, or the 4 digits on the front of an American Express card.

Please list any other relevant details regarding patenting of this invention. You have the obligation to the US Patent & Trademark Office to fully disclose any non-patented prior art. Also, if you sold or offered the invention for sale more than one year ago, your patent rights may be reduced. Please provide any information that may limit your patent rights or otherwise affect the strength of the application.

Important Notice: In order to qualify for foreign patent protection, you must file your foreign patent within one year of your earliest US patent application. If you have not filed a US application, you must not have publicly disclosed your invention or offered it for sale. Further, your invention must be new, useful, and non-obvious in light of all other prior art inventions. If it would be obvious to "one skilled in the art" or field of your invention, you may not ultimately receive a patent. Please be sure you understand the level of novelty of your device before assuming that merely by applying for a patent you will ultimately receive one. Patent Searches, if done through us or elsewhere, are never 100% complete, so there is always some risk that a patent search will have missed a relevant reference. "File as early as possible" is usually good advice. Each country has its own patent laws and filing requirements. You should make us aware of any potential public use or offer for sale of your invention beforehand so we can advise you as to the potential ramifications of public disclosure. Further, the PCT application does not result in an actual foreign patent, but preserves your right to file in member foreign countries. You should budget \$4,000 to \$5,000 per country for future "national phase" applications. Fees are deemed earned when received.

I have read the above and agree, and am including or authorizing payment. Please prepare the above patent application.
